Onsite Healthcare

Comprehensive Diagnostic Testing and Screening

Preventive Medical Service, Inc. (PMSI) represents the future to saving lives through early detection. Our goal is to identify disease and arrange medical treatment before it's too late. When you schedule PMSI to provide service at your facility our main goal is to identify disease through a variety of diagnostic screening tests.

Our Wellness and Preventive Medical Program is **UNIQUE** in that we offer state of the art technology designed to detect disease early enough to allow the participant the opportunity to obtain treatment before it's too late.

PMSI is at the forefront of this technological revolution. Understanding when and how to use these new tools can be a challenge even for well-versed specialists. PMSI takes the guesswork out of it.

Onsite diagnostic testing has become an increasingly popular tool for doctors to become more accurate and effective in treating their patients. At PMSI we only use the latest machines ensuring accurate outcomes.

The overall impact PMSI will have on your group is substantial. Your group will have access to a wide variety of diagnostic machines and services offering all participants the opportunity to address their medical needs. All test results are mailed directly to the participant ensuring confidentiality. All participants are encouraged to take their test results to their primary care doctor.

We look forward to discussing our services further with your organization. Please feel free to contact PMSI if you have any questions regarding our service. (718) 413-5040.

Benefits of Diagnostic Testing with PMSI

- Punctual, courteous and professional staff.
- Participants appreciate convenient testing in the comfort of their office or facility.
- Specialist available: Allergy, Cardiology, Neurology, Pulmonology, Radiology.
- Receiving treatment before it's too late.

Preventive Medical Services

214-55 Jamaica Ave., Queens Village, NY 11428

www.preventivemedicalservice.com

Our Mission: is to save lives through **EARLY DETECTION**. Our goal is to identify disease and arrange medical treatment before it's too late.

OUR PROGRAM: Is fully credentialed and approved In-Network medical provider with most health insurance carriers, Medicare, Medicaid, and Union Plans.

Our Wellness and Preventive Medical Program is **UNIQUE** in that we offer state of the art technology designed to detect disease early enough to allow the patient the opportunity to obtain treatment before it's too late.

We provide Medical Evaluations and Specialty Referrals (if needed). Our testing includes, but is not limited to, the following tests:

- ADR (adverse drug reaction) testing is done via a non-invasive buccal swab from inside the patient's cheek and results are based on each individual's unique DNA. It will identify adverse interactions of medications taken by the patient in order to prevent premature death. ADR's are one of the leading causes of morbidity and mortality in health care; it is the fourth leading cause of death, ahead of pulmonary disease, diabetes, AIDS, and automobile deaths.
- Allergy Testing – Food and Environmental
- Blood Pressure
- Cancer – we test for 94 different types of cancer genes
- Cardiovascular tests (echocardiogram, carotid artery, vascular arteries)
- Cystic Fibrosis testing through a genetic DNA diagnosis identifier
- Pharmacogenetic testing - a new technology to determine the effectiveness of drugs on an individual, both in terms of therapeutic effect as well as adverse effects, based on how it will metabolize in your system. This provides your doctor with an outstanding opportunity to prescribe the most effective drugs specifically for you and reduce the possibility of you having a serious event caused by an adverse drug reaction.
- Pulmonary Function testing
- Sudoscan – peripheral neuropathy and nerve damage scan
- TB Test
- Ultrasound testing (abdominal, carotid artery, thyroid, etc. as needed based on Doctor consult)
- VNG/ENG vestibular disorders/dysfunction (balance and dizziness issues)

FAQ – Frequently asked Questions (and Answers)

Q: Who needs to be screened? Am I too young?

A: Every adult should be screened. It is one of the first steps on the Path to Good Health. Age is not a factor. We should all have baseline tests to confirm our good health. Our tests can alert you to risk factors so “issues” can be addressed early, before they develop into a “problem”. Be proactive about your health. You have great reasons to stay healthy!

Q: How long does the Testing take?

A: Generally, after registration is completed, it takes 40-45 minutes to do the full screening.

Q: Is my personal information protected and kept confidential?

A: Yes, we are HIPAA compliant; your personal health information is kept secure and confidential.

Q: Who gets my test results?

A: When you register for testing you will be asked where you want your test results sent. You may choose to have them sent directly to you at your home address. You are then able to share the results with your personal physician if you wish. We follow HIPAA Privacy Rules and Medical Test Results are never shared with your Employer, your Medical Health Insurance Provider, or anyone else, unless you specifically request it.

Q: Will I do a full screening? Do I have to do the full screening?

A: One of our board certified doctors will determine which tests are recommended for you, based upon the personal health history you provide, your family health history and his one on one meeting with you. You may choose to do all the doctor recommended tests or opt out of some tests. We only do the tests you want.

Q: I need an Employee Health Screening / Examination for work. Will your doctor certify it for me?

A: Yes, if you make the staff aware of the form when you register and you complete the screening, generally we are able to provide you with the tests needed and provide the physician certification needed.

Q: Can I bring other family members / friends in to have the screening done?

A: Yes, as long as your employer allows visitors on site, we welcome you to invite other adults (spouse, parents, adult children, friends, etc.) to come in for testing as well.

Q: Does this affect my ability to see my personal physician for an annual physical?

A: No, in fact we encourage you to see your personal physician after you receive all your test results. By providing the results directly to you, you then have the ability to fully review them with your personal doctor, discuss any concerns and take the steps to ensure you are on the Path to Good Health.

Q: Why is it better to do this through this Wellness Program vs. my personal doctor?

A: Since these Tests are done as Early Preventive and Wellness Screenings we are able to provide you with many Tests, more than your personal physician does from his/her office at one visit. Your doctor would need to send you to multiple specialists, over multiple days, for all the tests we have available to you.

We are able to do all the Tests for you in about one hour, on one day, at one location.

PATIENTS MUST BRING THEIR HEALTH INSURANCE CARD AND PHOTO ID ON THE DAY OF TESTING

SAVE YOUR LIFE THROUGH EARLY DETECTION

HIPAA RELEASE OF INFORMATION / AUTHORIZATION FORM

I authorize the release of any medical information necessary to my Insurance carrier to process this claim. I permit a copy of this authorization to be used in place of the original.
