

# The LEST RECYCLING DRIVE of 2026

**Date:** Sat, April 11, 2026

**Time:** 10am-2pm

**Place:** Chester Town Hall

1786 Kings Highway, Chester NY 10918

## We're Collecting:

- window air conditioners
- dehumidifiers
- water coolers
- mini-fridges
- small appliances with refrigerants

## Why?

One of the most important things you can recycle is a refrigerant-containing appliance. Capturing refrigerants from end-of-life appliances is part of the solution to preventing greenhouse gas emissions from refrigerants.

Less than 10% of all appliances are properly recycled.

Tell your friends & neighbors about this opportunity!

## Cost?

FREE! No cost to participate.

## Event:

We'll collect & properly recycle small appliances with refrigerants, FREE of charge! Chester, NY and surrounding area residents are invited to bring old appliances with refrigerants to this annual event.

NOTE: Items must fit in the trunk of a car.

Event in cooperation with Sustainable Warwick.
